Compliments and positive aspects of Course Unit (Strong points)

Amazing class! Interesting, exciting and overall a lot of fun. The mix between the actual concepts and practical application was perfect, as well as the ratio between actual lectures and discussions/projects. Learned a lot even though it was not stressful to study at all. Absolutely great!

Classes are funny and enjoyable.

Easy to understand

Thankfully, the material was very directed to public policies, the area of our interest.

Very interesting and participative classes

Very interesting course, well structured, covers all the topics you can expect from this course. Very interactive lessons with lots of materials on which to delve into the topics.

Very practical course with many good examples.

the teacher is very engaging and can make class fun to attend

this was by FAR our best course! very fun and interactive, but also great content and good learnings

the tasks posed and especially the assignment was a LOT of fun to work on and made us think about problems in a new way that fits perfectly with our program and was extremely interesting to explore

this was by far the best course we had at IDPP.

Opportunities for improvement (Weak points)

-

I think there are no major flaws in this course. The only thing could be to accompany the much practice to a little more theory.

Looking at more real life policy case studies with the theoretical contents we discussed.

Maybe make contents from each class clearer from the beginning since sometimes I wasn't sure what we were supposed to be "focusing" on in each discussion (it was definitely clear afterwards but it would be nice to know beforehand).

sometimes, i didn't know what i had learned in class that day because we played too many games. also her frustration when something was taking longer than she wanted was annoying. she moved too quickly between games and expected everyone to follow along with no questions. like girl take a chill pill, it's not that serious

Additional comments and suggestions

Excellent Instructor

I had a great experience

The classes were super original, the content was well presented and the professor has given us different ways to retain the material which helped with our understanding. From someone without economics background, all the experiments done were really useful and fun at the same time. Overall, one of the best courses and teacher I've ever had!
